

INNOVATION TRANSFER & B2B COLLABORATION ON LI-ION BATTERY RECYCLING

EIT RAW MATERIALS PROJECT, 2022-2024

Main objectives

- Establish and expand a cradle-to-cradle Li-ion battery collection and recycling collaboration model in East and South-East Europe.
- Develop and transfer to local recyclers an innovative technological solution that will demonstrate the feasibility to optimise Lithium and Cobalt recovery from mixed NMC and LFP treatment.
- Map waste flows and secure increased market shares of LFP and NMC batteries in project countries.
